Canadian National Railways

THIS WINTER---

Make a visit with your relatives and friends. They will want to see you and know how you have prospered in this fair land.

OUR

Low Fares

make it easy for you to get away—just make up your mind you're going, and the local agent of the Canadian National will arrange all the details of the trip.

Canadian National through trains pass through a territory replete with scenic grandeur, and the most educational value to the traveller. On its trains will be found companions jolly and likeable—an infectious air of friendliness and good fellowship. There is nothing superior to the Canadian National sleeping and dining car service. Rail-receiving service is an added feature on the through trains.

Full particulars gladly given by any Canadian National Agent, or write J. MADILL, District Passenger Agent, Edmonton.

CHURCH NOTICES AND ACTIVITIES

CHURCH NOTICES

Sunday, November 4th, 1928

Services at—

Strawberry Plains — 11 A.M.
Alma Mater — 3 P.M.

Irma, — 7:30 P.M.

Subject "Are the beer parlors a blessing or a curse?" Which is the better, the bar or the parlor?

Sunday, November 11th Miss Giles, Dominion Secretary of Young People's work will be the speaker.

Sunday, Nov. 18th—the Anniversary Sunday. Rev. Jas. Bainbridge, M.A. MM.

CHURCH SCHOOL AT 11 A.M.

Is for Everybody—Come.

November 4th is World's Temperance Sunday. It is also Missionary Sunday and Mrs. Locke will speak on Livingstone. There will also be a Reading by local talent, and good music.

November 11th there is a treat in store for everybody. Miss Giles, who is in Dominion work for young people will favor us with a talk at 11 A.M. Do not miss hearing her.

November 18th, Anniversary Sunday, Rev. Bainbridge, of Viking, will address the school. He speaks every Sunday in his own church at Viking, and will have a vital message for everyone. Be on hand in good time—11 A.M.

ANGLICAN CHURCH

An Armistice Service will be held in the Masonic Hall on Sunday, November 11th. The Service will begin punctually at 10:55 A.M. and the two minutes silence will be kept from 11 o'clock.

—A. M. Trendall, Vicar Wainwright

ST. THERESA CATHOLIC CHURCH

Services Sunday, November 4th. Mass at 11 A.M.

Don't forget the 1c sale at the Irma Drug Store Thursday, Friday, and Saturday next.

CHRISTMAS IN THE OLD COUNTRY

Special Sleeping Cars

From
Edmonton, Calgary, Saskatoon, Regina
Consolidating into

SPECIAL TRAINS FROM WINNIPEG

FIRST TRAIN leaves 9:40 a.m. Nov. 20, to Montreal for sailing of S.S. "Montreal." Nov. 22, to Southampton, Havre, London.

SECOND TRAIN leaves 9:40 a.m. Nov. 21, to Montreal for sailing of S.S. "Audina" Nov. 23, to Glasgow, Belfast, Liverpool; S.S. "Ascania" Nov. 23, to Plymouth, Chelmsford, Antwerp.

THIRD TRAIN leaves 9:40 a.m. Nov. 22, to Montreal for sailing of S.S. "Laurentic," Nov. 24, to Belfast, Glasgow, Liverpool.

FOURTH TRAIN leaves 6 p.m. Nov. 29, to Halifax for sailing of S.S. "Pennland," Dec. 2nd, to Plymouth, Cherbourg, Antwerp.

FIFTH TRAIN leaves 9:40 a.m. Dec. 6 to Halifax for sailing of S.S. "Alauna," Dec. 3rd, to Plymouth, Havre, London.

SIXTH TRAIN leaves 9:40 a.m. Dec. 9th, to Plymouth, Chelmsford, S.S. "Frederick VIMY" Dec. 10, to Copenhagen, Oslo, Copenhagen.

SEVENTH TRAIN leaves 6 p.m. Dec. 9, to Halifax for sailing of S.S. "Baltic," Dec. 10, to Queenstown, Liverpool.

EIGHTH TRAIN leaves 9:40 a.m. Dec. 7, to Halifax for sailing of S.S. "Tuscania," Dec. 10, to Plymouth, Havre, London.

NINTH TRAIN leaves 9:40 a.m. Dec. 11 to Halifax for sailing of S.S. "Letitia," Dec. 14, to Belfast, Liverpool, Glasgow.

TENTH TRAIN leaves 9:40 a.m. Dec. 12 to Halifax for sailing of S.S. "Regina," Dec. 15th, to Glasgow, Belfast, Liverpool.

"WE CORDIALLY WELCOME SMALL ACCOUNTS"

At the annual meeting of the
BANK OF MONTREAL,
Sir Frederick Williams Taylor,
General Manager, said:

"I should like to take this opportunity of saying that we cordially welcome small accounts at all our offices."

At the **BANK OF MONTREAL**, no account is too small to receive the undivided attention of its officers

BANK OF MONTREAL

Established 1817

Total Assets in excess of \$860,000,000

Irma Branch: R. M. CAMPBELL, Manager.

On behalf of the officers and members of the Ladies Aid I wish to thank all who made our annual bazaar such a success. I wish especially to thank Mrs. L. C. Hatch for the splendid donation for the fish pond. Mrs. Hatch has donated most freely for the last 3 years and is most enjoyed by the children.—M. Tripp, Secretary Ladies Aid.

ROSEBERRY U. F. A. MEETS
TUESDAY, NOV. 13th

On Tuesday, November 13th, the Roseberry U. F. A. will hold a meeting to outline their programme for the winter. Several committees will also report on prices of coal, flour, etc., if bought through the local. All members and everyone else interested in these matters are asked to come and make the meeting a success and a benefit to the community.

Mr. S. C. Miles has purchased the West half of Section 35-45-9-4, cornering the Section on which Irma is situated.

The pupils of the Strawberry Plains School District are being taught in the Peterson house till a new school can be built in the spring. This school was burned down last week but the trustees decided it would be better to use the house for the winter than to attempt to build a new school so late in the season.

Two new families expect to move to Irma within a week or so. Mrs. G. N. C. Higginson, who is building a new house west of the United Church expects to have it completed next week. Also Mr. J. C. McKay expects to have his house ready for occupation before Thanksgiving.

The Greatest Radio Value Ever Offered

Westinghouse

Westinghouse

6Tube CONSOLE
for Only \$167⁰⁰ Uses UX201-B
Radiotrons

When you buy a Westinghouse Battery Aid you own a beautiful instrument that embodies the latest improvements at a price that represents more radio value than has ever been offered before.

It gives you:

Full 6-tube power, using the new Westinghouse UX-201-B and UX-121-B Westinghouse Radiotrons.

Selectivity, finely balanced, giving equal performance in the upper and lower wave bands.

True-to-life tone quality—both high and low notes reproduced with equal fidelity.

Economy of operation. The new UX-201-B Radiotron uses only half as

much filament current as the former standard UX-201-A, thereby reducing the cost and frequency of "A" battery recharging.

Distant stations brought in with ease and clarity.

New improved cone speaker, developed by Westinghouse, and many other features which we will be glad to show.

Single dial control.

The Grading of Wheat

The heavy frosts which descended upon Western Canada during the third week of August, had a most disastrous effect upon a large portion of the wheat crop of the prairie provinces, with a resultant lowering in grades, which, in the aggregate, means a loss of many millions of dollars to the farmers producers of the west. Just how great the loss is will probably never be accurately known, but thousands of individual farmers will, more or less correctly, estimate what it means to them. Volume of production remains, the greatest in the history of the country, but grades, and consequently prices, are seriously affected.

Under the circumstances, it is but natural that an outcry is raised against the whole system of grading, and some very rash statements are intimated in. The farmer who gets Number Three feels he ought to have received Number Two, and the man who is given Number Four contends he ought to have had Number Three, and so on down the line. This is but natural, but the result is that elevator operators, whether in the Pool or line elevators, are charged with taking advantage of the situation and grading too low. Governments, both federal and provincial, are held responsible for the system of grading in vogue, although, as a matter of fact, provincial governments do nothing to do with grading which, as a matter of trade and commerce falls solely within the jurisdiction of the Dominion. If there was any truth in the charge that the Liberal Government, in Saskatchewan, is responsible for low grading this year, then the Farmer Governments in Manitoba and Alberta are equally responsible.

The truth of the matter is, of course, that neither Liberal, Conservative, Progressive nor United Farmer Governments are responsible. It may be that the present system of grading requires revision but even that cannot be determined offhand. Canadian wheat occupies an enviable reputation in the markets of the world, and because of that reputation commands a good price. That reputation is based on the quality of our wheat, and that quality is guaranteed through our system of uniform Government inspection and grading.

It may well be that in a year like the present, a relaxation in grading would result in a larger proportion of our wheat being placed in higher grades, and better prices received by the growers. On the other hand, a lowering in the standards might very easily result in a general lowering of all prices, so that the final result would be much the same.

But assuming that this did not happen this year, the undoubtedly result would be injurious to the reputation of Canadian wheat and any gain derived this year would be more than offset in other years because of the poorer reputation for all our wheat that would result. The reputation of Canada's wheat abroad is the biggest asset we have in the British and European markets, and it must be retained at all hazards. And to tamper with grading solely in order to meet climatic conditions in any one year would be fatal to that reputation.

There is this, however, to be considered. Does frost, which mars the appearance of the wheat kernels, and results in lower grading, actually impair the milling qualities of that wheat, and the baking properties of the flour made from such wheat? In other words, does frost affect the real quality of the wheat to the extent that our present standards of grading would indicate? If it does not, then it would seem that our grading need not be quite so drastic without affecting the established reputation of our wheat.

Thus, however, is a question that can only be determined through study, research and experimentation. It cannot be decided in a day or two, or set aside by legislative enactment. The Dominion Government is fully alive to the importance of this question, and the Government Research Laboratory, working in conjunction and full co-operation with all Western universities, is engaged in the task of ascertaining the actual facts and the full truth. In this important work the three provincial governments, the Wheat Pools, and the United Farmer organizations are all assisting.

Pending the result of such searching investigations, it is a mistake and unprofitable for anybody to seek to inflame public opinion out of an unfortunate condition resulting from the vagaries of the weather which no man, or body of men, can direct or control. Rather should every man and every organization having the best interests of Canada at heart do what lies in their power to assist in this great work to the end that all may benefit.

Want Tariff On Berries

B.C. Fruit Growers Want Seasonal Tariff On Importation From U.S.

A request for a reasonable tariff from May 15 until July 31, yearly, to apply on imported berries. United States strawberries to prairie points in advance of the arrival of British Columbia fruit was made by a delegation of Saanich fruit growers in representations made to Hon. W. D. Eber, minister of national revenue, and Hon. Dr. J. H. King, minister

of health, in a conference at Victoria. Mr. Eber asked if it was the intention of the delegation to ask for a high tariff that would prohibit all buying.

They explained that the growers wished a reasonable tariff, not necessarily a high one, but one that would apply between the period of from May 15 to July 31.

The request was one that would require careful consideration and special legislation to bring into effect commented the minister, who promised to lay the matter before Hon. J. A. Robb, federal minister of finance, on his return to Ottawa.

For Women Senators

Reported That Government Will Facilitate Further Steps To Be Taken

The Ottawa Citizen says: "Those organizations which want the right of women to sit in the Senate affirmed, are to be facilitated in the further steps they propose to take." The facility will probably take the form of the Government paying the costs of both sides in an appeal to the privy council from a judgment of the supreme court of Canada declaring women ineligible for appointment to the Senate under the B.N.A. Act as it stands."

"Mistress: 'And what's your baby's name, Mandy?'"

Colored Maid: "Hallud! We named him from the Bible."

Mistress: "Hallud? I never heard that before."

Maid: "Oh, yes'm. Ain't yo' never read 'Hallud be thy name?'"

Nansen Believes Arctic Route Most Favorable
Explorer Planning Zeppelin Flight Between Europe and United States

A Zeppelin flight between Europe and the U.S. by way of the Arctic regions in order to determine the practicability of that route is now being actively prepared by a committee under the chairmanship of Fridtjof Nansen, noted polar explorer. It is believed that weather conditions will be more favorable in the Arctic than over the regular North Atlantic route.

The Zeppelin will be commanded by Captain Walter Bruns, secretary of the Society of Arctic Research. It is understood that the coming aeronautical convention in Berlin will fix the date for the Arctic flight, which probably will be next May or June.

Three Russian scientists, Prof. Wiese, meteorologist; Prof. Schmidt, biologist, and Prof. Isachenko, microbiologist were in Koenigsberg recently, en route to Berlin, and discussed plans for the expedition.

WEAK AND NERVOUS

A Condition Due To Watery Blood—Easily Corrected Through Use Of Dr. Williams' Pink Pills

Thin, pale girls lack the power of resistance to disease that rich, red blood gives. Hereditary conditions, diseases of the blood. She is in a state of nervousness, headaches, backaches and many other troubles. Girls suffering from thin impure blood need just the help Dr. Williams' Pink Pills can give. They are made by a world-famous blood-builder and nerve restorer. They actually make new, rich, red blood which imparts new vigor and strength to the entire body. Their first effect is usually shown by an improved appetite; then the spirits revive and resilience at night gives way to health restoring sleep. For sufferers from nervousness, anemia, general debility or physical exhaustion Dr. Williams' Pink Pills are a restorative of the utmost value. This is proved by the experience of Miss Sarah A. McEvans, B.R., of 34 Spring St., N.Y., who, about three years ago, I became very weak and anemic. I had pains in my side and back. I also had frequent pains in the back of my head and neck. I was very pale and nervous. I had attacks of nervous irritability, and at times I was so nervous that life seemed hardly worth living. While in this condition I tried every remedy available to me. Dr. Williams' Pink Pills were recommended to me. I was only too glad to tell them I was Dr. Williams' Pink Pills. I am now enjoying good health and am glad to give this statement to you. I hope it may be of some other sufferer."

You can get these pills from any medicine dealer or by mail at 50 cents a bottle from The Dr. Williams' Medicine Co., Brockville, Ont.

End Season's Work

Freighters From Hudson Bay Return To Nova Scotia Ports

All freighters being used in Government work on Hudson Bay, have been sent to Nova Scotia ports for winter months, according to wireless despatches received at the Department of Marine. The tug Dauntless and the steamers Canadian Voyager and Odile, left Fort Churchill recently. The vessels have been used in carrying material to be used in the construction of the harbor.

Ready-made Medicine.—You need no physician for ordinary ills when you have Minard's Liniment. Dr. Thomas' Electric Oil. For common colds, sore throat, bronchial troubles, it is invaluable; for scalds, burns, bruises, sprains, it is unsurpassed; for rheumatism, soreness and the like, an unquestionable healer. It needs no testimonial other than the use, and it will satisfy anyone as to its effectiveness.

"What are you doing with that red lantern?" "Oh, I just found it. Some carefree fellow left it beside a hole in the road."

Many mothers can testify to the virtue of Mother Graves' Worm Exterminator, because they know from experience how useful it is.

When Noah sailed the waters blue, He had his troubles, same as you. For forty days he drove the Ark Before he found a place to park.

Minard's Liniment for aching joints.

Lindbergh Going To Turkey
Mrs. Evangeline Lindbergh, according to a dispatch sent by the Constantinople correspondent of the Egyptian Daily newspaper Ahram has said that her famous son, Col. Charles A. Lindbergh, intends to visit her shortly in Turkey. The two will make an aerial journey to Syria and Jerusalem, to visit the holy places of Christianity.

Immigration for Canada from the United States this year is 25 per cent greater than a year ago.

Rheumatism
A little Minard's rubbed into parts affected relieves rheumatic pain. Also good for bruises and sprains.

MINARD'S
"KING OF PAIN"
LINIMENT

Proves Airship Practicable

Zeppelin's Flight Shows It Superior To Plane For Ocean Crossing Says Expert

Captain Walter Bruns, noted aviation and Zeppelin expert, is of the opinion that the voyage of the Graf Zeppelin from Germany to the United States, has conclusively demonstrated the practicability of the airship for trans-ocean communication.

"Such a collection of bad weather as the Graf Zeppelin encountered," he said, "of course is not an everyday occurrence. In normal weather, the Zeppelin should span the ocean easily."

"From an expert viewpoint, it would be an interesting thing to have the worse weather imaginable, for it proved that the airship can do what the aeroplane cannot possibly do, go a long distance out of the way of a storm; or, if caught in it, merely drift until it blows over. The Graf Zeppelin was delayed in its arrival longer than expected... But what of it? Why apply different standards to an airship than to an ocean vessel. The big greyhounds recently have been from 23 to 36 hours late. Yet nobody has found fault with them."

"No airplane can afford to fly great distances to evade storms, because its fuel supply is too limited; also it cannot have conveniences for weather observations which the gondola of an airship affords."

Asked whether he thought Dr. Eckener had possibly yielded to pressure and started at an inadvisable time, Captain Bruns replied: "I don't think so; on the contrary, Dr. Eckener undoubtedly said to himself, 'If I can only get the Zeppelin out of the hangar, I can fly in any kind of weather.'"

A Remarkable Invention

Metaphone Eliminates Noise When Detector Comes Near Metal

Metals are made to talk by a new invention, called the "Metaphone," which is being perfected by its discoverer, Mr. W. S. Clayton. This remarkable new instrument, which resembles a wireless receiving set, emits loud noises when the "detector," which is connected with it, comes near any metal.

The possible uses to which the Metaphone may be put, says the London Daily News, are almost innumerable. It can be used to detect sunken submarines, sunken treasure at the bottom of the sea, and with a small set it is possible to detect the presence of a knife, revolver, bunch of keys or cigarette case in a person's pocket.

Although the invention is but now fully developed, Mr. Clayton has already conducted some satisfactory experiments at sea off the coast of British Columbia. The instrument, carried on board a salvage steamer, detected the presence of some iron wreckage well below the surface of the water. Either carabiners or a loud speaker can be used in connection with the invention.

Minard's Liniment—Popular for 50 Years.

Lindendorff Is Worried

General Eric von Lindendorff, former quarter-master-general of the German army is reported to have appealed to President von Hindenburg for help against Free Mason lodges which he claims have "passed a death sentence upon me and my revelations of their nefarious methods."

Master Mason CUT PLUG SMOKING TOBACCO IN PACKAGES AND 1/2 LB. TINS
A mixture of very fragrant and mild tobaccos

Children's COLDS Relieved Without "Dosing"

MOTHERS over prefer the external treatment, Vicks VapoRub, because it avoids the constant "dosing" which so frequently disturbs delicate little stomachs. You just rub it on. Most colds yield by morning.

Acts 2 Ways at Once

Freedom From Insect Pests

Loss From Insects Has Been Very Light In Western Provinces

Membership In League Of Nations Organization Is Growing

General freedom from insect pests in the western provinces is reported by the Dominion entomological branch. Grasshoppers which in former years worked havoc in the crops have been found scarce this year. The sugar beet crop in southern Alberta is stated to have suffered to some extent from the red-backed cutworm but the control campaign instituted by the department has localized the infestation. In the same province the alfalfa crop has been attacked by the Berlin army worm. Dusting of the crop is expected to eradicate the pest. Losses from insects are generally small, officials of the branch indicate.

Health Cannot Be Looked For In The Child That Is Subject To Worms, Because Worms Intrude With Their Internal Disturbances And Retard Development And Cause Serious Weakness.

Miller's Worm Powders expel worms and are so beneficial in their action that the systems of the little sufferers are brought into healthfulness. Now all the discomforts and dangers of worm infection are removed, and satisfactory drying is assured.

Senora Alice Cunha Machado, was free on a writ of habeas corpus because the Supreme Court listened to her plea that her child did not deserve to be born in jail.

10 minutes ago-

How many people you know who end their colds with Aspirin! And how often you've heard of its prompt relief of sore throat or tonsils. No wonder millions take it for colds, neuralgia, rheumatism; and the aches and pains that go with them. The wonder is that anyone still worries through a winter without these tablets! They relieve quickly, yet have no effect whatever on the heart. Friends have often told you Aspirin is marvelous; doctors have declared it harmless. Every druggist has it, with proven directions. Why not put it to the test?

Aspirin is a trademark registered in Canada.

ASPIRIN

Canada's Rise To Eminence As a Wheat Producing Country Makes a Fascinating Study

Canada's rise to eminence as a wheat-producing country forms by far the most far-reaching feature of the Dominion's economic advance during the present century, and the preliminary estimate of this year's production, as recently issued by various authorities, indicates that the 1928 crop will, in volume, surpass all previous records. While the final results may vary considerably from the best early estimates, the preliminary report of the Dominion Bureau of Statistics forecasts a wheat har-

vesting almost every year, culminating with the phenomenal crop of 1915. The 1915 harvest was literally a "wonder" crop, and established a new mark which stood as the record for longer period than any other crop since the opening of the century. Finally, in 1922, the output of 1915 was exceeded, and in 1923 another heavy harvest set the record which held good for the following four years. Now, according to the best information, the 1928 crop has well exceeded the coveted figure of 500,000,-

vest amounting to roundly 550,000,000 bushels.

The successive stages by which Canada has achieved its present immense volume of wheat production furnish one of the fascinating pictures of Canadian development. It is hard to realize that the wheat crop for the opening year of the twentieth century fell below 60,000,000 bushels and that until 1905 did the harvest for the first time reach 100,000,000 bushels. In the ten years following 1905 new records were reached

for the eleventh time since 1900 surmounted all previous high marks for wheat production.

From now on Canada can scarcely expect to establish new levels in wheat output as frequently as in the earlier years of the century, but it is assuring to know that the ultimate wheat-producing capacity of the Dominion, as estimated by the experts who have most carefully studied the country's land resources, is yet far from being attained.

South African Pleased With Canadian Farms

Believes Dominion Offers Better Opportunities Than Other Countries

Taking the British harvesters' scheme as it affects me personally, I vote it a success," declared Geoffrey Harris Mitchell, who was in Winnipeg, on his way back to South Africa after six weeks' experience as a harvester in the district near Brandon, Man. "I wish to state right here," he said, "that I am absolutely satisfied with the treatment I received from the various farmers. I worked for, and that the food provided me in all cases was really excellent and that the general conditions of farm life, at a time when every household was of necessity overtaxed, compared decidedly favorably with farm conditions I have experienced in South Africa.

Referring to the complaint of other British harvesters, Mr. Mitchell said that they may not have been so fortunate, some of them, in choice of territory and work as he was, but at the same time most of the men had exactly the same chances he had. "In the district I was in," he stated, "I can vouch that there was an actual shortage of harvest help, many farmers leaving portions of their crop lying on the ground unstooped simply because they were unable to procure the necessary labor."

His reply to the question "Why are so many of the British harvesters returning home?" was that many of them were simply homesick and had been ever since they lost sight of England. "Perhaps this is not so hard to understand when one takes into consideration the fact that many of these men have spent few nights away from their homes during their whole life up to now." There was, too, the inevitable percentage of "wont works" backed up by agitators.

"How do you like being married?"

"Awful. I am not allowed to smoke, drink or go out at night."

"You must get very bored."

"I am not allowed to do that either!"—Viking, Oslo.

N. W. U. 1756

"To the man who has it in him to put old associations aside for the future," said Mr. Mitchell, "and concentrate on adapting himself to a new country, and, in many cases on overcoming that even bigger obstacle to farm settlement in any country, namely, the change from a life spent in an industrial centre to that of a field worker in the great outside of Canada, the British harvesters' scheme offered a good jumping-off place to establishing such a man as a settler on his own farm."

Mr. Mitchell, who spent a year on a sheep farm in the Eastern Cape province of the Union of South Africa and two years as a trooper in the British South African Mounted Police of Rhodesia, was impelled to come harvesting to Canada, when on a holiday in England, he saw the harvester excursions advertised. He came to Manitoba by the Canadian National Railways and was helped by them in finding a place. Although he is returning to police duties in Africa, he is of the opinion that Canada offers a better opportunity to the average man than does South Africa, and possibly also Australia.

Chinese Buy Many Records

Phonograph Market In Hong Kong Absorbs Thousands Every Year

The growing popularity of dancing among the Chinese has resulted in an increased demand for English and American phonograph records. Perry N. Peter, United States Vice-Consul at Hong Kong, informs the Department of Commerce.

Jester estimates that the phonograph market in Hong Kong will absorb from 250,000 to 275,000 records a year, of which about 30,000 will be records in the English language or with Occidental music. The larger stores carry stocks of from 6,000 to 8,000 pieces at a time, he says.

Sounds Logical

"Mother," she began, "what does trans-Atlantic mean?"

"Across the ocean," replied the mother.

"Then, does 'trans' always mean across?"

"Yes, it does, always." And the mother added sternly, "If you ask another question tonight, I shall send you to bed."

The second silence lasted about three minutes. It was broken at last by a plaintive, small voice which commented, "Then I suppose trans-parent means a cross parent!"

Inquisitive Kiddy: What's a dachshund, Dad?

Dad: A 1-story dog with Charles-ton legs. Now go to bed.

When a man's business runs down the *sheerit* comes along and winds up.

An Old Welsh Legend Story In Connection With Devil's Bridge Is Amusing

An amusing legend is told in connection with the Devil's Bridge at quaint old Abergavenny, in Wales. The story is that Megan Llandaff was troubled one day to know how to bring her only cow across the chasm. The devil came along and offered to bridge the gorge if, in return, he might have the first-living thing that crossed it. Megan agreed, and the devil expecting that Megan would be the first to pass made the bridge. But Megan was toxy. Taking a piece of bread from her pocket, she threw it to the other side of the bridge and sent her dog after it. The devil took his defeat very sensibly and left his bridge there for future generations of the clever Welsh.

Favor Wool Contracts

Growers of Alberta and Saskatchewan Plan Change in System Of Marketing

Following some conferences among representatives of the wool growers of Alberta and Southern Saskatchewan some rather radical changes in the system of marketing wool may evolve, the details of which are now being worked out.

There has been considerable dissatisfaction for some years among the various wool growers' associations of Alberta and Saskatchewan due to the uncertainty of volume through these associations. During good seasons the growers sell to local buyers, getting advantage of prices which it is contended are maintained through the activities of the Canadian Co-operative Wool Growers' Association. In bad seasons all the wool is dumped on the co-operative and the consistent supporters lose it, is claimed, through the spasmodic support given by the others. It is understood that the associations are planning some arrangement whereby they will only handle the wool of members signing contracts over a period of years.

Grain Elevators In Canada

Largest Terminal Elevator On Continent Is Located At Port Arthur

There are 4,558 grain elevators in Canada with a total capacity of 284,818,200 bushels. Country elevators number 4,423 with a capacity of 146,639,200 bushels. Terminal, manufacturing public and private elevators total 119 with an aggregate capacity of 138,179,000 bushels. All the country elevators, except two, are in the three prairie provinces—Manitoba, Saskatchewan and Alberta—where over 90 per cent. of the wheat crop and the larger percentage of other grains is grown. The terminal manufacturing public and private elevators are principally at Port Arthur, Fort William, Montreal, Vancouver and other ports at Ottawa, the chief supervisor of these stations shows that each year improvements are being made by the various operators of the stations in the care and housing, and in the quality and care of the breeding stock. Some of the operators who permit parts of their farms to be used for these stations, have been building new up-to-date houses, while others are remodeling old ones—in conformity with modern ideas with respect to lighting, ventilating, and general comfort. By careful breeding and selected flocking are being improved in egg laying qualities. The stock they are able to produce are readily sold to farmers in the surrounding districts served by the stations. Last year there were distributed from the stations 602 cockerels, 682 pullets, and 1,528 settings of eggs from breeding stock that had produced more than two hundred eggs per year.

The largest terminal elevator in North America is at Port Arthur, Ontario. It has a capacity of 6,900,000 bushels. It is owned and operated by the Saskatchewan Pool of the Canadian Wheat Producers Ltd., the largest farmers co-operative marketing organization in the world.

A Man's Good Friend

The dog owner needs no mask. His dog protects him. He can afford to take people on his dog's valuation. "Love my dog, love me." Best of all, the dog-owner is never lonely in his own house, for he knows that there is a welcome for him whenever he returns, and that if he chooses to sit down at once by the fire and read without worrying to give a full account of his day's experiences the dog will quite understand and settle contentedly at his side, knowing that the best sort of spiritual companion ship requires no explanation.

Little Girl: Why are the chickens making such a noise, mummy?

Mother: They want their breakfast, dear.

Little Girl: Well, if they're so hungry why don't they lay themselves some eggs?

At the Christening of the Duchess of York

A charming photograph of H.R.H. the Duchess of York, taken upon her arrival at the Clyde with the Duke of York, to christen the newest of the Canadian Pacific-Duchess liners. The Duke, speaking after the ceremony, said that the occasion was the first time a member of the Royal Family had sponsored a merchant vessel. The progress of Their Royal Highnesses through the yards was headlined in Britain as a "tour of cheers." The Duchess insisted on seeing everything connected with the vessel herself, crawling under the keel and making a very thorough inspection. At luncheon after the launching, Sir George McLaren Brown, European general manager of the Canadian Pacific, presented her with a souvenir copy of a booklet showing pictures of the launches of the four Duchesses steamships, including on the front page a photograph of the launch by Her Royal Highness of the vessel which carries her name.

Underlying Cause Of Canada's General Prosperity Due To Development of Agriculture

Of Interest To Hog Raisers

Tankage May Be Used As Slim Milk Substitute For Feeding Hogs

Hog raisers who cannot obtain skim milk for their stock, can find a satisfactory substitute in tankage which is a product of the abattoir. At Lemireville, Quebec, Experimental Station, four lots of hogs were fed to ascertain the value of tankage as compared with skim milk. With two lots, skim milk and tankage were compared with pigs from weaning to finishing for the market. The other two lots were fed skim milk to four and five months, and then finished on tankage. The cost of the feed did not vary greatly per pound of gain throughout the whole series, amounting from 6.93 cents per pound for the lot getting skim milk throughout the test, up to a little over 7 cents for the lot getting tankage throughout. This test is reviewed in the Report of the superintendent of the station for last year, in which he says that the lot which had meal and skim milk from weaning to finishing made the largest and cheapest gains. Those fed for five months on skim milk and finished on tankage came second, the pen getting skim milk for four months, and tankage of the balance of their lives, came third, while the lot fed tankage from weaning to finishing, were slightly below both in gains and in profit. This test shows that tankage is a very suitable substitute for skim milk when the latter feed is not available. The tankage used is designated "special 45 per cent. protein hog tankage." The meal mixture for the four lots for the first two months consisted of 2 parts oats, 1 part middlings, 1 part corn, 1 part beans, and 1 part shorts; for the second two months, 2 parts oats, 1 part middlings, 1 part shorts, and 1 part corn; and for the last six weeks, oats and corn constituted two parts each with one part each of middlings and shorts.

Will Ask For Protection

To Safeguard Producers Of Fruit, Vegetables and Poultry Against Foreign Dumping

A Man's Good Friend

The dog owner needs no mask. His dog protects him. He can afford to take people on his dog's valuation. "Love my dog, love me." Best of all, the dog-owner is never lonely in his own house, for he knows that there is a welcome for him whenever he returns, and that if he chooses to sit down at once by the fire and read without worrying to give a full account of his day's experiences the dog will quite understand and settle contentedly at his side, knowing that the best sort of spiritual companion ship requires no explanation.

Little Girl: Why are the chickens making such a noise, mummy?

Mother: They want their breakfast, dear.

Little Girl: Well, if they're so hungry why don't they lay themselves some eggs?

Most of us regard the oak as emblematic of Britain and the British nation. It therefore comes as something of a surprise to learn, from the latest report of the Imperial Economic Committee on Forest Products, that Great Britain spends more than £2,000,000 a year on importing oak, and that less than 1 per cent. of the supply comes from the Empire itself, while 75 per cent. is sent here from the United States. It is even more astonishing when it is realized that the tree itself does not grow in America and that she gets her supply from British Honduras.

Consider the Horse

Why drivers of wagons and horse-drawn vehicles insist on neglecting to put lights on their conveyances after dark is a mystery. True a few do carry lights, but a great many do not. If the person driving does not think of his own safety, he should at least consider the horse. An adequate light costs little, and may easily be the means of preventing a fatality.

Would Make It a Dozen

Zaro Agha, who says he is 155 years old, is seeking his twelfth wife. Unlike most individuals who have been married a number of times he has never been divorced. "I am an affectionate, faithful and non-quarrelling husband," he said. "Each of my previous 11 wives died of happy old age."

Failure is a kind of automatic thread cutter on the human sewing machine.

Every year the Dominion Government votes the sum of seven million dollars in aid of agriculture. Care is taken to expend it in the most economical way possible to meet the demands of the industry, demands which cannot rightly be met by any other organization, this annual expenditure representing about 41 per cent. of the gross agricultural revenue. In other words, the cost of administering the Dominion Department of Agriculture is approximately 41 for every \$1,000 of gross revenue. Based on the gross agricultural wealth of the country in 1927, the Government expenditure amounts to .08 per cent., or \$8 for every \$10,000 of our agricultural wealth. No one converses with the importance of agriculture to Canada questions the propriety of Parliament voting this annual grant in aid. But far too many people do not understand how great is this importance of agriculture, and still less are they aware of the actual value of the work conducted by the Dominion Department.

Agricultural returns are the barometer of Canada's national prosperity. This is generally recognized by those who have the wider vision; those who realize that the rise and fall of business generally is due largely to one main factor—the crops. Weather conditions, crop reports, crop estimates and, in fact, everything pertaining to crops are closely followed by the leaders of our industrial enterprises, as closely, indeed, as they are by the farmers themselves. Canada has had many problems in connection with her agriculture that have been peculiarly and particularly her own. She has solved many, and an army of workers under the direction of the Dominion Department is working night and day to solve more and more of them. Those who are responsible for the directions of these workers are probably the only people who fully realize the enormity of the task.

The Dominion Department of Agriculture is made up of eight branches viz.: The Experimental Farms; Dairy and Cold Storage; Health of Animals; Live Stock; Seed; Entomological; Fruits and Publications. These are the main divisions with, in addition, the seventeen hundred projects under investigation at Experimental Farm. The responsible heads administer the numerous regulations under the following Acts of Parliament: Animal Contagious Diseases; Cold Storage; Dairy; Dairy Produce; Feeding Stuffs; Fertilizers; Fruits; Hay and Straw; Meat; and Canned Foods; Root Vegetables; and Seeds. Promotion work covers a very wide field, and to those carrying on this work may be given the credit for the development of co-operative marketing. By this means, together with the standardization of products, Canada has been enabled to compete successfully in the open world markets.

That the experimental and investigation work carried on by the Department has literally made Canadian agriculture is not putting the case too strongly. It has resulted in the extension of our northern agricultural boundary, enabled farmers to grow crops in certain districts where crops never grew before, increased the yields, controlled destructive pests, and, in short, has made agriculture the industry that is and must ever be the bedrock of the national prosperity. All classes benefit from the wealth drawn from the soil, and the underlying cause of Canada's general progress and prosperity is the satisfactory condition of her agriculture. This condition, too, the Dominion Department is at all times striving further to develop and improve.

To a Jewish ex-service man an acquaintance remarked: "So you were in the army, eh?"

"Oh, I was in the army," was the proud response.

"Did you get a commission?"

"No, only my vagab."

"He is looking closely at my Farmyard Scene. Is he a critic or an estate owner?"—Megendorfer Blaster, Munich.

Rubber Aprons 50c

These splendid aprons are guaranteed to give exceptional good wear, for they are made of heavy quality gum rubber, and are strongly constructed throughout. Finished in bib style with heavy straps at waist and shoulder. Attractive flower pattern in several nice shades.

LIDEN'S LTD., Irma

advice. "I'll try right along, Donald, to get your goat by cursing and using vile language, but don't listen 'im, and don't lose your temper. Eights with 'is chin tucked in the hollow of 'is left shoulder and 'is neck muscles rigid. It's mighty 'ard to land on 'is jaw with a right. Now the first round," Andy went on, "you just jab 'im right with your left; don't 't 'ard, just a good snapping punch. 'Eh, think you 'ave no sting in it, and the next round 'e'll get careless and let you 'im 'so red to get a punch. — Of course, if you see a good opening, let fly with all you 'ave, but 'e won't open up until 'e tries you out a bit. Watch the dirty blighter in the clinches; 'e'll foul you if 'e gets a chance. Another thing: this is to be twenty rounds, so take your time. Now is everything clear to you, Donnie?"

"Yes, Andy."

Andy patted Donald's bare shoulder affectionately.

The contestants stood in their corners as they were introduced. The referee beckoned them to the centre of the ring for instructions. As Donald slipped the enveloping bathrobe from his shoulders and stepped forward, a murmur of admiration swelled from the crowd. His lean loins and broad shoulders showed to advantage in the bright light. The long, flowing muscles rippled under his skin when he moved, like those of a panther. Loud applause came from all over the arena. Garneau, thinking the ovation was for himself, turned and ducked his head with a motion that was intended for a bow.

"A rough voice near the top shouted: "Aw! that wasn't for you, you big stiff!"

The judge and the dentist turned and looked at each other. The eyes of the latter seemed to say, "I told you so." The judge smiled and nodded.

A fat man, who could not have been more than thirty-five years of age, yet with rolls of fat at his waist-line, a bulbous nose and florid face, bit savagely on a big cigar. "By gad!" he ejaculated, "that man is perfect!" There was a look of admiration and envy in his red-rimmed eyes. Thus do men admire the strong well-built body of the athlete, even though their own physical self has degenerated to mere paste.

"Two to one that Garneau wins inside of ten rounds!" shouted a voice.

Douglas covered the bet at once.

"Now, nem," instructed the referee briskly, "this is to be for twenty rounds. You are to fight clean breaks. You can hit with one arm free, but you cannot hold with one and hit with the other. When I say 'Break! I want you to break at once and step back. Do you understand fully? Good! To your corners."

Donald glanced at his friends, who sat with their eyes upon him. He felt Andy's hand upon him gently stroking his arm, yet he could not suppress the trembling in his limbs.

"Everything's all right, Donnie," whispered Andy softly.

Garneau assumed the crouch Andy had prompted, his chin resting in the hollow of his shoulder, his eyes seeming to retreat into his skull under the overhanging brows. This was the champion famous "fighting face."

"Pretty boy, ain't yer?" he scoffed. "I'm goin' to knock down pretty fast, I'm goin' down your throat, you..." he cursed.

Donald snapped a right left to the ugly face and danced out of range. The champion's thick lips parted in a ferocious grin. "My, mamma's nice boy has a terrible punch," he derided.

Donald continued his dancing foot-work, keeping the champion in pursuit and contending himself with occasional left-hand jabs that kept his opponent's head rocking. He shot glances at intervals to his corner for instructions from Andy, who nodded his head in approval of his tactics.

The round finished in the challenger's favour by a wide margin on points. The champion had not landed a single effective blow during the round.

The action of the first round caused Donald to forget his nervousness. Andy crowded between his knees and gently massaged his body, all the while speaking words of commendation and counsel.

"Now that you find that you can reach 'im easily with your left, watch me for signals. If I see that 'e's opening up, I'll give you the sign to shoot your left with all you 'ave. If he swings again with 'is left, try for 'is broad basket. You understand me, Donnie?"

"Easiest thing I've picked yet," chuckled the champion as he came to his corner.

"He may be stalling," cautioned his evil-faced manager.

"Huh!" grunted the champion. "I can take all he has in his left and never feel it. I'm goin' to open up on him de laast part of de next round."

The gong rang for the second round.

Her Color Went Black. She Was Frightened To Death

Mrs. Waite, New Brighton, writes: That deadly indigestion and gastritis, caused by constipation made my color as black as a raven. I was frightened to death, and I fear your last advice saved my life. I take them every night now for precaution, and do not fear an attack of constipation poisoning any more."

CARTER'S LITTLE LIVER PILLS

All druggists—25¢ and 75¢ red pills.

Donald caught a glimpse of Purcell's face as he crouched in the opposite corner. Such a look of vicious hate shot from his one gleaming eye that Donald shivered.

The rough element began to boom for Donald's running tactics. Some fans feel that they are being cheated out of the price of admission unless you can witness the spectacle of two boxers slugging toe to toe until one goes down. Science counts nothing with this small minority. "Whaddya ya think this is, a marrathon?" they shouted.

"Powder-puff punch!" derided another.

Garneau suddenly tore in, letting loose a terrific right that would have stopped the bout right if it had landed. From a clinch, Donald looked to his corner. Andy went through the pantomime of shooting a straight left. Donald nodded.

"Powder-puff punch!" again shouted the disgruntled fan.

"Did ya hear that?" hissed Garneau, twisting his mouth into an apish grin. "Yo, can't hit hard enough to break an egg. I'm goin' to fix de fett for you now." He leered brutally as he tore after Donald, disdainful of the belittled left.

Donald stopped abruptly in his flight and shot a lightning left across to his pursuer's jaw. The champion saw it coming, too late to block it. He threw his body into reverse, robbing the blow of a great deal of its force; yet enough was left to send him reeling back to the ropes, his head whirling and his knees wobbly. With a roar the spectators came to their feet as one man. The gong saved Garneau.

The crowd gave Donald a deafening ovation as he walked to his corner. He looked for his friends and saw Douglas and Gillis locked in an embrace and dancing madly in the narrow aisle.

A LAUGHING BABY IS A GREAT JOY

What can give more joy in the home than a laughing, happy baby. The well child makes everyone happy with his tuneful gurgle and bright laughing eyes. It is only the sickly baby who is not a laughing baby, for it is the healthy one's nature to be happy when well.

Mother, if your baby is cross, if he cries a great deal and no amount of attention seems to make him happy, give him a dose of Baby's Own Tablets and he will soon be well and ready to radiate that happiness through the home again.

Baby's Own Tablets are a mild but powerful laxative. They relieve the bowels and sweeten the stomach and thus banish constipation and indigestion; break up colds and simple fevers and correct those troubles which accompany the colds and fever. Doing them well—they make baby happy and keep him happy.

The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

(To Be Continued.)

Teeth and Health

Issued By The Canadian Dental Hygiene Council and Published By The British Columbia Dental Society

TOOTH DECAY

You do not allow your child too many sweets lest they spoil his teeth, and, wisely, did not let him know their taste too early. But where the hazard lies?

Now, as you have read, no doubt, so called tooth decay is a disease that is incited by bacteria. These micro-organisms have the power of setting up a destructive process in the carbohydrates situated in the mouth, producing acids which attack the tooth substance to dissolve it; in this manner, these organisms gain access through the hard enamel covering.

You perhaps did not suspect the presence of bacteria in your mouth, did you? Yet, a noted authority states that more than a hundred different species would undoubtedly be isolated from a single mouth at one time or another.

Now, as far as it is neither practicable nor possible to cut off the carbohydrate food supply, nor to rid the mouth of bacteria for any length of time.

However, nature herself is not wholly defenseless against the situation, for the acid-forming, as a rule, is neutralized by the saliva and removed before it can do injury—excepting where it can lie undisturbed as in deep pits or fissures, or beneath food particles that adhere to the tooth, with proper mouth toilet is not the daily rule.

But you must do your part by avoiding excessive use of carbohydrate foods such as sugars, starches and all other substances that are of a carbohydrate nature; this is a definite control that can be instituted especially when proper mouth toilet is not the daily rule.

In addition to laboratory experiments, the bulk of the submarine S-4 which took 40 men to their deaths after she was rammed by the Coast Guard Destroyer, Paulding, off Provincetown, Mass., December 17, 1927, will be used in rigorous tests off Cape Charles, Va., in October. These tests are to be conducted by Lieut. C. B. Monson, submarine expert and diver.

Attempts will be made to learn conditions that exist during the wrecking of underwater craft and devise methods of countering and preventing them. Naval divers will be placed beside the hull which will be sunk and flooded. They will then escape through hatches and come to the surface by using the navy's new breathing device, "the lung," and other rescue apparatus developed during the last few months.

The singing Mennon was a statue in Egypt which gave out musical notes when the sun rose in the morning and as it set at night. After the statue was tipped over it no longer sang.

Excited Person (complaining to postmaster): "And if I don't get better service, I shall give my postal business to someone else."

Headache? Believe with Minard's Liniment.

"Have you anything to say, prisoner before sentence is passed upon you?"

"No, your honor, except that it takes very little to please me."

Trying To Eliminate Hazards Of Submarines

U.S. Navy Will Make Test Of Rescue Apparatus

Stirred by undersea craft disasters that have taken the lives of scores of American officers and men, the navy is making strenuous efforts to eliminate the hazards of submarines by devising and perfecting rescue apparatus.

Many experiments are being made and plans carried out for exhaustive tests to learn what happens when a submarine is stricken below surface. No man has survived a submarine accident wherein the craft was totally disabled and flooded while under water, and none has been able to tell just what occurs under those conditions.

In addition to laboratory experiments, the bulk of the submarine S-4 which took 40 men to their deaths after she was rammed by the Coast Guard Destroyer, Paulding, off Provincetown, Mass., December 17, 1927, will be used in rigorous tests off Cape Charles, Va., in October. These tests are to be conducted by Lieut. C. B. Monson, submarine expert and diver.

Attempts will be made to learn conditions that exist during the wrecking of underwater craft and devise methods of countering and preventing them. "No, your honor, except that it takes very little to please me."

"Let us therefore come boldly unto the throne of grace, that we may obtain mercy, and find grace to help in time of need." — Hebrews iv, 16.

Of what an easy, quick access, My blessed Lord, art Thou! how suddenly

May our requests Thine ear invade! To show that state dislikes not easiest

If I can lift mine eyes my suit is made;

Than thou canst no more not hear than Thou canst not see." — George Herbert.

Prayer is a key which, being turned by the hand of faith, unlocks all God's treasures.—Hannah More.

Believe Asthma At Little Expense.
Thousands of dollars have been vainly spent upon remedies for asthma and seldom, if ever, with any relief. Dr. J. D. Kellogg's Asthma Remedy, despite its assurance of benefit, costs so little that it is within the reach of any asthmatic, far removed from the class of doubtful and experimental preparations. Your dealer can supply it.

Unusually Rapid . . .

"See that large building on our right?" said the booster to the visitor he was showing 'round.

"Yes."

"Did you notice it was on our left when we came down town?"

"Yes."

"Well, that gives you some idea how rapidly our city changes."

The Dangerous Age

What is the most dangerous age of a person in respect to accidents? According to the Workers' Compensation Commission at Sydney, N.S. W., a person of 20 years is in the greatest peril. From that age the accident rate decreases and the safest age is set down at 75 years.

CRUMBLY TEETH

Help your children to have sturdy bodies, sound bones and strong teeth. Give them.

Scott's Emulsion

rich in vitamins. It serves the needs of childhood equally as well as it does grown people. Scott & Bowne, Toronto, Ont.

There's been a revolution in the science of battery building—Eveready has found a way to give you more battery for your money than you ever bought before!

The new Layerbilt principle can be understood by anyone. It simply gives you more current-making elements by packing flat cells like crackers in a box, instead of using many round cells with waste space between.

You actually get the equivalent of a much bigger battery and, of course, it takes much longer to use it up. That's why you should buy Eveready Layerbils and save money. Now selling at new low prices. Ask your dealer.

"I'll try right along, Donald, to get your goat by cursing and using vile language, but don't listen 'im, and don't lose your temper. Eights with 'is chin tucked in the hollow of 'is left shoulder and 'is neck muscles rigid. It's mighty 'ard to land on 'is jaw with a right. Now the first round," Andy went on, "you just jab 'im right with your left; don't 't 'ard, just a good snapping punch. 'Eh, think you 'ave no sting in it, and the next round 'e'll get careless and let you 'im 'so red to get a punch. — Of course, if you see a good opening, let fly with all you 'ave, but 'e won't open up until 'e tries you out a bit. Watch the dirty blighter in the clinches; 'e'll foul you if 'e gets a chance. Another thing: this is to be twenty rounds, so take your time. Now is everything clear to you, Donnie?"

"Yes, Andy."

Andy patted Donald's bare shoulder affectionately.

The contestants stood in their corners as they were introduced. The referee beckoned them to the centre of the ring for instructions. As Donald slipped the enveloping bathrobe from his shoulders and stepped forward, a murmur of admiration swelled from the crowd. His lean loins and broad shoulders showed to advantage in the bright light. The long, flowing muscles rippled under his skin when he moved, like those of a panther. Loud applause came from all over the arena. Garneau, thinking the ovation was for himself, turned and ducked his head with a motion that was intended for a bow.

"A rough voice near the top shouted: "Aw! that wasn't for you, you big stiff!"

The judge and the dentist turned and looked at each other. The eyes of the latter seemed to say, "I told you so." The judge smiled and nodded.

A fat man, who could not have been more than thirty-five years of age, yet with rolls of fat at his waist-line, a bulbous nose and florid face, bit savagely on a big cigar. "By gad!" he ejaculated, "that man is perfect!" There was a look of admiration and envy in his red-rimmed eyes. Thus do men admire the strong well-built body of the athlete, even though their own physical self has degenerated to mere paste.

"Two to one that Garneau wins inside of ten rounds!" shouted a voice.

Douglas covered the bet at once.

"Now, nem," instructed the referee briskly, "this is to be for twenty rounds. You are to fight clean breaks. You can hit with one arm free, but you cannot hold with one and hit with the other. When I say 'Break! I want you to break at once and step back. Do you understand fully? Good! To your corners."

Donald glanced at his friends, who sat with their eyes upon him. He felt Andy's hand upon him gently stroking his arm, yet he could not suppress the trembling in his limbs.

"Everything's all right, Donnie," whispered Andy softly.

Garneau assumed the crouch Andy had prompted, his chin resting in the hollow of his shoulder, his eyes seeming to retreat into his skull under the overhanging brows. This was the champion famous "fighting face."

"Pretty boy, ain't yer?" he scoffed. "I'm goin' to knock down pretty fast, I'm goin' down your throat, you..." he cursed.

Donald snapped a right left to the ugly face and danced out of range. The champion's thick lips parted in a ferocious grin. "My, mamma's nice boy has a terrible punch," he derided.

Donald continued his dancing foot-work, keeping the champion in pursuit and contending himself with occasional left-hand jabs that kept his opponent's head rocking. He shot glances at intervals to his corner for instructions from Andy, who nodded his head in approval of his tactics.

The round finished in the challenger's favour by a wide margin on points. The champion had not landed a single effective blow during the round.

The action of the first round caused Donald to forget his nervousness. Andy crowded between his knees and gently massaged his body, all the while speaking words of commendation and counsel.

"Now that you find that you can reach 'im easily with your left, watch me for signals. If I see that 'e's opening up, I'll give you the sign to shoot your left with all you 'ave. If he swings again with 'is left, try for 'is broad basket. You understand me, Donnie?"

"Easiest thing I've picked yet," chuckled the champion as he came to his corner.

"He may be stalling," cautioned his evil-faced manager.

"Huh!" grunted the champion. "I can take all he has in his left and never feel it. I'm goin' to open up on him de laast part of de next round."

The gong rang for the second round.

Men's Sheep Collar
